

## ROBIN AVERY BIO

While you may hear echoes of Sade, Marvin Gaye, Laura Nyro, and Carole King, there can be no mistake that Robin Avery's music and voice are all her own. In her new release, ***THE WAY YOU HOLD ME***, Robin teams up with producer Paul Banman and offers her unique fusion of smooth jazz and R&B/Pop. With lyrical reflections on life and love, Robin's songs flow to the rhythm of life covering the joys and pangs of men and women who are trying to connect, separate, or find their own meanings.

Robin's cover of the Cars 80's hit, ***Drive***, brings a fresh sound to the vocal that is uniquely Robin Avery. The track also features internationally acclaimed smooth jazz artist, **Warren Hill**, adding his lyrical and soulful saxophone to the mix.

Robin's ***Kiss Me InThe Rain*** is a warm, vibrant call to live fully and spontaneously and to treasure laughter and love in each moment. ***What Was OnYour Mind***, a hypnotic samba, speaks of the secrets partners keep, and the realities they deny to maintain relatedness with one another. Other musical gems, including ***Finally Free*** and ***Ebb And Flow***, await you on this album release.

Robin regularly appears on South Florida stages creating a vibe of excitement, warmth, and authenticity. Building on her previous national radio airplay, she'll no doubt be turning heads in many other places in the near future.

Robin Avery is a rare artist. In a time when others in her format are looking to jump on a trend to get momentary exposure, Robin is an artist whose music and words paint wonderful images of what we want our lives to be, and who we aspire to become. This is truly an artist who will stand the test of time.
